Automated Video Interviewing with ZappyVue

Reduce time-to-hire by more than 70% with our Automated Video Interview Software

The Future of Screening is Here with ZappyVue's Automated Video Interviewing

Slow and inefficient interview processes have long been a major challenge for recruiters.

Studies show that time-consuming interviews increase the risk of losing top talent by **29%**, something organizations absolutely can't afford!

However, there is a better way forward!

84% of candidates prefer incorporating video interviewing in the hiring process, prompting a widespread shift towards a more efficient way of hiring.

ZappyVue's Automated Video Interviews is one such highly advanced solution that revolutionizes the interview process.

They are used for the screening of candidates and conducting job interviews remotely. In this format, candidates record their responses to predefined interview questions using an online platform, accessible on multiple devices.

By streamlining interviews, you are able to save screening time, cost and effort, while ensuring you don't miss out on top talent!

Customers Love Us and Here's Why

"AI Robotic Interview is very interesting to understand the candidate before taking the interview thus saving a lot of time. I also like the AI Ranking which is giving a score to understand the match of the candidate to the particular job assigned."

Kavya B.
Assistant Manager - HR Business Partner

"An innovative Recruitment Automation Software for seamless hiring. The most impactful features of Zappyhire would be chatbot and the robotic interviews. This helps in filtering out the right profiles."

Abhijith P.
HR Manager
